## EXPERIENCE

### **Sodexo, Milton Keynes** — *Developer*

March 2017 - Present

Working in conjunction with web and oracle teams to integrate various salary sacrifice and employee benefits platforms under the Sodexo banner into one system.

Developing new, scalable platforms and building/maintaining RESTful APIs for our services.

Developing bespoke websites for large, corporate B2B campaigns and consumer programmes.

### **Market Force Information (Europe) Ltd , Milton Keynes** — *Developer*

March 2016 - March 2017

Working within a close team to develop our new client reporting platform - KnowledgeForce™, and continued development of our RESTful API for our Android & iOS apps - Eyes:On™.

Responsible for transferring knowledge and providing developer documentation, so staff are able to assist in migrations to KnowledgeForce™.

### **Market Force Information (Europe) Ltd, Milton Keynes** — *Junior Developer*

June 2015- March 2016

Developing bespoke reporting platforms suitable for a diverse range of business sectors and new, scalable technology platforms using Yii – a popular object-oriented MVC framework.

Working in conjunction with Hack and Craft GmbH by developing the API backend for our iOS & Android app, whilst documenting the API endpoints with Swagger.
